UNIVERSITY OF MICHIGAN

Powering Research. Advancing Michigan.

Learn More at a Community Town Hall

The University of Michigan has identified a **144-acre site at Textile and Bridge Roads in Ypsilanti Township** as the preferred location for a new high-performance research computing center.

This site was selected because it is zoned for light industrial use and meets all of the project's infrastructure needs while still allowing U-M to preserve natural areas and maintain significant buffers from nearby homes and parks.

Join us to hear from the project team, ask questions and share your community priorities.
The event will be livestreamed for those unable to attend.

Wednesday, September 9

5–7 p.m.

Ann Arbor Marriott Ypsilanti at Eagle Crest

1275 S. Huron Street
Ypsilanti, MI 48197

Registration is required:

Committed to Being a Responsible Neighbor

We will:

- Preserve a significant portion of natural areas on the site
- Not draw from or discharge into the Huron River
- Evaluate the use of closed-loop cooling or reclaimed water to reduce freshwater consumption
- Build a dedicated DTE substation to protect electricity rates
- Operate the fully electric facility with no smoke or odors
- Design cooling systems and facility layout to significantly reduce noise

Have questions?

Please attend our town hall, visit our website to learn more about the project and the site selection process, or email us directly at **hpc-center@umich.edu**
